

# CALF MILK REPLACER

RELIANCE CALF MILK REPLACER is a milk powder blend providing excellent calf response to the natural feed sources of milk fat, milk proteins and sugar.

## FEEDING RECOMMENDATIONS

**MIXING RATIO:** 125g RELIANCE CALF MILK REPLACER to one litre of water when fed twice daily, 250g Calf Milk Replacer up to one litre with water when fed once daily.

Dissolve RELIANCE CALF MILK REPLACER powder in hot (not boiling) water. Mix to a creamy smooth consistency and add cool water to make up the required amount. Feed at body temperature (38-40°C).

Mix only when required. Keep bag closed when not in use.

Feed after a good intake of colostrum has been achieved (from four days after birth). Ensure that clean drinking water is available at all times.

Ensure that calves have access to hay and quality calf feed.

Keep buckets, bottles and other equipment clean.

**STORAGE:** Store between 10 and 20°C in clean, dry conditions. Do not expose to direct sunlight and avoid contact with floor and walls.

## COCCIDIOSTAT

**RELIANCE CALF MILK REPLACER WITH BOVATEC®;** Bovatec is registered pursuant to the ACVM Act 1997, No. A009679. See [www.foodsafety.govt.nz](http://www.foodsafety.govt.nz) for registration conditions.

**FOR ANIMAL TREATMENT ONLY:**  
Contains Bovatec 20CC at 500mg/kg of feed (100mg/kg of lasalocid)

**INDICATIONS:** As an aid in the control of coccidiosis caused by Eimeria species in calves and goats.

**DIRECTIONS:** Feed a 50kg calf 0.5kg/day of RELIANCE CALF MILK REPLACER WITH BOVATEC® to provide 1mg/kg lasalocid per kg body weight. Up to 2mg lasalocid/kg body weight is indicated where severe coccidial challenge is expected or where a wide range of individual live weights occurs within a group. Ensure young animals are adapted to medicated feed for 2 to 3 weeks prior to weaning, as coccidia challenge is most likely in the 8 weeks after weaning. In any case, initiate treatment at least 2 days prior to coccidial challenge.

**CONTRAINDICATIONS:** Care must be exercised when feeding concurrently with other antimicrobials.

Do not feed with other ionophores e.g. monensin capsules, liquid or premix. Ensure recommended dose rates are not exceeded. Not to be used as a single dose treatment.

**CAUTION: DO NOT FEED TO BOBBY CALVES.**  
Do not feed to dogs, horses or other equids as ingestion by these species may be fatal. This product must not be used for growth promotion in ruminants intended for human consumption. It is an offence for users of this product to cause residues exceeding the relevant MRL (Maximum Residue Limits) of Agricultural Compounds in the New Zealand Food Standard. By law the user must take due care, obtaining expert advice if necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.
