Reliance lamb Performance Pellets are a high protein lamb pellet to encourage good growth rates in young lambs.

Reliance lamb Performance Pellets contain:

- Quality ingredients in a pellet to ensure optimum utilisation and reduced wastage
- GutBoost™ with prebiotics and essential oils for lamb health and feed intake
- High levels of digestible energy and metabolisable energy (ME) with a combination of carbohydrates and vegetable oils for good growth in young lambs.
- Molasses for increased palatability
- A wide range of essential vitamins, minerals and trace elements. This includes vitamins A, D and E, as well as trace elements such as zinc, selenium, iodine, cobalt and manganese

Reliance feeds are part of CRT’s quality assurance program and are quality tested to meet their stated specifications.

**Feeding Recommendations**

Reliance lamb Performance Pellets are specifically formulated for orphaned lambs, but can be fed to lambs on ewes prior to and after weaning.

Feed Reliance lamb Performance Pellets from four days after birth (after good colostrum intake has been achieved) or from weeks three to four after feeding Reliance lamb STARTmix. Feed Reliance lamb Performance Pellets until six weeks of age or for improved growth rates. Feed until eight weeks of age.

For orphaned lambs, provide Reliance lamb Performance Pellets along with lamb milk replacer and grass or hay. Ensure lambs have access to clean drinking water at all times.

**Typical Analysis (DM Basis)**

<table>
<thead>
<tr>
<th>Ingredient</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Energy</td>
<td>13.9MJ/kgDM</td>
</tr>
<tr>
<td>Protein</td>
<td>19%</td>
</tr>
<tr>
<td>Fat</td>
<td>3.5%</td>
</tr>
</tbody>
</table>

The Metabolisable Energy (ME) values are calculated by a registered laboratory from an equation and are not an actual measured value. Therefore they are only a guide for predicting the energy content of a feed.
